Brian DeMoss, Vice President of Construction
Modular Technology
22425 North 16th Street
Phoenix, AZ 85024

Dear Mr. DeMoss:

The purpose of this correspondence is to compliment Modular Technology for the wonderful work done in the construction of our new high school. It was a pleasure to work with your company throughout the process.

It was our good fortune to select Modular Technology as our builder as a result of going to a "design build" bidding process. You were able to meet our budget ceiling of slightly more than \$4 million for a 33,000 square foot facility. Furthermore, you were able to meet our construction timeline so that our new school could be ready for students in August. You said that you could meet the timeline and you did.

I must also acknowledge the quality of your construction. In many cases, you went beyond our expectations in installing quality doors, cabinets, bathrooms, tile, and more. I continue to be amazed at the difference quality insulation and construction makes. Even during July and August with temperatures ranging in the mid 90's, when one enters the school, you would think that air conditioning had been on for hours it is so cool and comfortable.

In service satisfaction, little things mean a lot. Not only did you attend a number of meetings in our district, which meant a minimum of five hours each way for your team, but you also attended our dedication ceremony and contributed \$500 towards it. We felt that your staff were honest and prompt in dealing with any questions we had. At the conclusion of the project, there were just a few punch order items which you promptly addressed.

I would highly recommend that other school districts consider the services of Modular Technology.

Very truly,

Richard McClements, Ed. D.
Superintendent
