“Bank management couldn’t be happier with Modular Technology’s patience and capabilities. Give everyone who has been working to get these branches open, a big thank you. My boss and I agreed that the way you finish your projects is so professional and well done. I am aware of the extra time, effort, and coordination it took to work around our staff and vendors. I am really pleased.”

David Crews, Project Manager , AVP

classrooms | gyms | multipurpose & admin buildings | portable replacement | full campuses

Modular Technology worked with the owner, Bank of Oklahoma and ART-Team Architects to build this bank in 5 months. The owner’s previous schedules were 22 months. This boutique bank has finely appointed mahogany and leather office & lobby furniture, chandeliers, and wainscoting.

Three branches, Mesa, Scottsdale and west Phoenix, were under construction at the same time and all delivered in just 5 months.
