"Project Managers were actively involved with each project and were very informed, responsive and professional. Your construction method allowed the bank to reduce our delivery time (22 months to 5 months). Everyone was great, understood our needs, and satisfied our needs quickly & professionally."

David Crews, Project Manager , AVP

classrooms | gyms | multipurpose & admin buildings | portable replacement | full campuses

Modular Technology worked with the owner, Bank of Oklahoma and ART-Team Architects to build this bank in 5 months. The owner's previous schedules were 22 months. This boutique bank has finely appointed mahogany and leather office & lobby furniture, chandeliers, and wainscoting.

Three branches, Mesa, Scottsdale and west Phoenix, were under construction at the same time and all delivered in just 5 months.
