

# Building Outside the Box

**Franklin Arts Academy Gold Campus**  
 formerly Life School College Preparatory Charter School  
 2929 East McKellips Road, Mesa Arizona

This open and spacious charter school beautifully displays Modular Technology's design flexibility and ability to customize exteriors.

This school features traditional Santa Fe architecture with vigas, stucco and canopied entryways. The varying roof parapets attractively

screen all mechanical units, while the use of smaller high-mounted windows provide abundant lighting while minimizing outdoor distractions for the students.

An 8-foot perimeter wall ensures privacy for the students and minimizes noise disruption for the

surrounding community. Other notable features include:

- Design build campus
- 21,000 square feet
- 14 classrooms
- Dining room
- Administrative area
- Student drop-off area
- Football field
