

**Lela Alston Elementary School—
40,500 square foot campus, 5 months**

**Moya Elementary School—
52,000 square foot campus, 5 months**

**Pueblo del Sol Elementary School—
48,000 square foot, two story addition to
existing campus, 5½ months**

**Nearly 200,000 square feet on 6 campuses
in less than 3 years**

Building Outside the Box

**Zito Elementary School—
16,000 square foot addition to existing
building, 4 months**

**David Kazan Family Education Center
(Preschool)—
6,500 square feet, 5 months**

**Carl T. Smith Middle School—
31,464 square foot campus, 5 months**

Isaac School District, Phoenix

Repeat clients remain the foundation of Modular Technology's business with Isaac School District as a stellar example. Modular Technology participated in 6 qualifications based, design build selection processes, each with a unique selection committee. Each evaluation committee selected Modular Technology as the highest qualified team.

The projects included new campuses with buildings ranging in size from 6,500

square feet to 52,000 square feet and included additions on existing campuses from 16,000 square feet to 48,000 square feet.

Demolition work was completed while school was in session and, according to Assistant Superintendent Dr. Mary Radcliffe, "The team at Modular Technology was extremely focused on completing the projects while keeping student and adult safety a top priority."

The accelerated design and construction schedule was less than 7 months for each school compared to 12-18 months for "traditional" construction. This School District was experiencing rapid growth and did not have the luxury of time. Partnering with Modular Technology gave the School District nearly 200,000 square feet of educational space in a record 30 months.
